REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the Applicant invoked 35 U.S.C. 112, para. 6. Thus, the entire language of the specification including the concept of analytical recognition means and holistic recognition means are included into the claim. Therefore, the prior art of records do not show the limitations "holistic recognition" and "analytical recognition" as disclosed in the original disclosure.

Regarding independent claims 2 and 3, the prior art of records do not show the limitations "constructing a character segmented features list from the features of the input phrase and from the holistic answer list, the character segmented features list being a list of character feature sets segmented by characters in each answer from the holistic answer list" and "translating the image of the input phrase into images of characters segmented according to answers in the holistic answer list based on the character segmented features list"

Claim 3 further claims the "recognizing characters from the character cutout images and generating a plurality of character variants for each character position in the input word based on each segmentation hypothesis" and "interpreting the plurality of character variants of the input word for each segmentation hypothesis based on a vocabulary". The prior art of records also do not teach these limitations.
